

Research:

There are ongoing research studies for dystonia at Mount Sinai Beth Israel. If you have dystonia and there are two or more family members with the condition please email movewell@chpnet.org for more information about how to participate. Participation involves filling out paperwork, having a neurological exam, and giving a blood sample.

Clinical Care:

The Alan and Barbara Mirken Department of Neurology Center for Movement Disorders at Mount Sinai is a comprehensive center for the treatment of Parkinson disease, essential tremor, dystonia, ataxia and chorea. It is a Bachmann-Strauss Dystonia and Parkinson Foundation Center of Excellence and a National Parkinson Foundation Center of Excellence.

Support Groups:

Free lectures and open group discussion. Please contact us for upcoming dates and to RSVP at 212-844-6134 or BIMCMovDis@chpnet.org.

Meetings are held at: Philips Ambulatory Care Center (PACC), 10 Union Square East, Manhattan, Fifth Floor Levy Conference Room 5K04

- **Dystonia (NYC Adult Group):** For adults with dystonia. Meetings are 6 - 8 pm
- **Deep Brain Stimulation:** For patients who have already had DBS. Meetings are 1 - 3 pm
- **Deep Brain Stimulation Candidacy:** Open to patients and family members looking to find out more information about DBS for movement disorders. Meetings are: 1 - 3 pm
